Himanshu Bansal

Decision Analytics Associate, ZS Associates

An Analytics professional with immaculate Python experience and an unbridled zeal to learn and grow.

WORK EXPERIENCE

Decision Analytics Associate ZS Associates

10/2021 - Present

Tasks

- Analyzed the marketing spend time series data worth \$40MM of a US pharma MNC, discussed trends and patterns in the data with the company leadership.
- Using *Python* and *Generalized Linear Regression* and did a marketing mix exercise to find the ROI of different promotional tactics.
- Suggested optimized spend strategy using response curves to maximize revenue.

Solution Delivery Associate Deloitte Touche Tohmatsu Limited

08/2019 - 09/2021

Tasks

- Worked in the team that handled Application Security for a US based conglomerate.
- Hypothesized and built a POC for an automated incident assignment tool using *Python* and *Selenium*.
- Implemented and managed role based and table based security in SAP.

PERSONAL PROJECTS

Image Search Engine

- A recommendation engine that takes both image and text as input was built using various ML frameworks in *Python*. An open-source data set that contained 20,000 images of various products was used.

Fraud detection in Financial data

- The data set containing 6 Million transaction data points out of which only 8 thousand were frauds. I used SMOTE and random forest to build a model that had a recall score of .91 and a f1 score of .54, also used LIME to understand the rationale behind the predictions.

Covid vaccine registration BOT

- Worked as a volunteer in COVID vaccination camps and wrote a script using *Python* to automate the registration process. The BOT was capable to making 15 registrations per min.
